### **DETAILED ACTION**

1. This Office Action is responsive to the RCE and IDS filed on 4/14/08. Accordingly, claims 1-10 are currently pending.

### **REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance:

-Regarding to independent claim 1, none of prior art of record teaches or suggests an apparatus for compressing a GPS signal, as claimed. Barnard (5,241,561), previously cited, teaches the claimed apparatus except he fails to teach that the apparatus comprises a second mixer for receiving a carrier-removed GPS signal and a separately received frequency reference signal that is received at the apparatus separately from the GPS signal and outputting a resultant signal, as claimed. In light of specification of the instant application (figure 1 and col. 6, line 17 to col. 7, lines 4), the separately received frequency reference signal is defined being a received signal (114), transmitted from a separate location and received at the apparatus, namely, not internally generated by the apparatus. Barnard does not teach such a separately received frequency reference signal received by the apparatus. Barnard teaches a second mixer for receiving a carrier-removed GPS signal and a frequency reference signal wherein the frequency reference signal, however, is internally generated by the apparatus. It would not have been obvious for one skilled in the art to implement Barnard for leading such the implementation to the claimed invention.

-Regarding to independent claim 5, none of prior art of record teaches or suggests a receiver comprising an antenna for receiving a GPS signal from a GPS satellite and for receiving radio signals over a radio link to a base station, the radio signals including a frequency reference

Art Unit: 2611

signal; a second mixer for receiving a carrier-removed GPS signal, being derived from the GPS signal, and the frequency reference signal and outputting a resultant signal; a comb filter for filtering the resultant signal and obtaining a first output comprising filter lines; and a frequency shifter for shifting the filter lines to produce a compressed GPS signal.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
